U.S. Patent and Trademark Office PTO-37 (Rev. 3-98)

Technologic Certain 800 bility

Application/Control Number: 09/274,601

Art Unit: 2873

**REASONS FOR ALLOWANCE** 

1. Claims 1-22 are allowed, as revised in accordance applicant's preliminary amendment,

filed June 21, 2000. The examiner's statement of reasons for allowance follows.

2. The instant application is directed to maskless projection microlithography systems. In

particular, independent claims 1 and 19 recite interferometric microlithography systems wherein

each of a plurality of coherent electromagnetic beams are manipulated in such a way that at least

one of the amplitude, phase, and/or polarization of each beam is modulated before being directed

to an overlap region where the modulated beams interfere constructively/destructively to produce

a non-periodic pattern. Each coherent beam is modulated by one of a plurality of beam control-

lers that are positioned to receive a respective one of the of the individual beams. Each beam

controller is electrically connected to, and under the control of a single system controller. Inde-

pendent claim 11 recites the steps of the particular method of producing a spatially non-periodic

interference pattern embodied in the invention(s) commensurate with applicant's independent

claims 1 and 19. The prior art made of record, taken either singly or in combination, fails to an-

ticipate or fairly suggest the limitations of applicant's independent claims noted above, in such a

manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The invention(s), there-

fore, is considered to be in condition for allowance as being novel and nonobvious over prior art

3. Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Al-

lowance."

Art Unit: 2873

REMARKS

4. The application having been allowed, FORMAL DRAWINGS ARE REQUIRED in re-

sponse to this Office Action.

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure: Anderson et al. (U.S. Patent 5,142,385) discloses coherent microlithography systems

capable of sub-micron spatial resolution.

6. Any inquiry concerning this communication or earlier communications from the exam-

iner should be directed to David N. Spector whose telephone number is (703) 305-1521. The ex-

aminer can normally be reached at this number Monday through Friday between 6:30 AM and

3:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's super-

visor, Georgia Y. Epps, can be reached on (703) 308-4883. The fax number for the organization

where this application is assigned is (703) 308-7722.
